1. Project progress

CISESK is working in an innovative **Window for EU mobility of volunteers all around Europe.**

European Voluntary Service is actually considered as an opportunity for training and professional mobility: through non formal/informal (NF/I) learning experiences thousands of volunteers all over Europe improve and/or acquire useful competencies for their own personal, educational and professional development as for their social integration, and increase their sense of European citizenship.

The objective of **Window for EU mobility** is to build, mainstream and promote the exploitation at European level of a system assessing and certifying competencies acquired by volunteers during own experiences via NF/I learning. Such system (friendly, web-based and recognised at European level) will enable CISESK partnership to reach its main objectives: to promote the employability of volunteers through the certification of recognised qualification levels, to provide Third Sector organisations with tools that make them able to attract more and more youths to such training and professional experience, to foster transnational mobility of volunteers through the start up of a network among Third Sector organisations.

Actually, CISESK also aims to promote and to foster the mobility of volunteers throughout Europe, and it may be possible only through an official and mutual recognition of competencies and experiences acquired in the various EC countries

2. Window for EU mobility of volunteers

The **Window for volunteers' mobility** would not have any reason to exist if it would not offer a real possibility to carry out experience also outside of the own national context. For these reasons each partner brings not only the possibility to translate and to make the CISESK kit valid at a transnational level, but also contributes to create the basis for its usability across EU by implementing important actions of mainstreaming and exploitation.

CISESK Certification of Civil Services non formal and informal Skills

Actually, the **Window for volunteers' mobility** will contain a database of the Third sector organisations that aim to benefit from such opportunity, and of the volunteers that desire to promote own "certified" experiences through the mobility, in other terms working in other European third sector organisations.

So, such platform will represent the means enabling a match between voluntary job demand and offer at an European level.

The **window for European mobility of volunteers** will contain information about the laws regulating voluntary service in the various involved countries, about the third sector organisations that will join the initiative and about the volunteers that will desire to make an experience in another European country (the platform will enable demand and offer to easily establish a contact)
